● ● ● ● BARÈME SCRELEC 2023 MALUS

Applicable at 1st of January, 2023

Technology	Fees in Euros per kilo (excl. Taxes)
Secondary Lithium batteries <u>without</u> Cobalt	0,525
Secondary Batteries Nickel Métal Hydride (Ni-MH) ≥ 30gr	0,201

- **SECONDARY LITHIUM BATTERIES WITHOUT COBALT**

Different families of lithium batteries coexist.

The families of lithium batteries, without cobalt (LMO, LFP), have an economic and environmental impact, as well as a life span inferior to those based on cobalt (LCO, NCA, NMC). Screlec has chosen to apply a malus to them.

- **SECONDARY BATTERIES NICKEL METAL HYDRIDE (Ni-MH) ≥ 30gr**

Nickel Metal Hydride secondary batteries in stick format (less than 30g) can be used to replace alkaline batteries of the same format.

Used in similar conditions, these batteries have a lower environmental impact.
